Financial Decisions Pac

Addendum Card

1. In the FINANCE 1B Module, the prompts for the Modified Internal Rate of Return (MIRR) program were inadvertently reversed. When **SAFE RATE=?** is displayed, key in the risk rate. Likewise, when **RISK RATE=?** is displayed, key in the safe rate. In the example on Page 25 of the applications book, the risk rate is 8% and the safe rate is 10%.
2. The Bonds program does not correctly calculate the yield of a short-term bond. When you wish to determine the yield of a bond held for 1 full coupon period or less, you must do the following:
 - a. Store either the call price or 100 in Register 19.
 - b. CF 22
 - c. Press **[E]** to calculate the yield.

This Addendum Card applies to manuals with part number 00041-90042 (original printing and Rev. B).
