Standard Handbook

Addendum Card

The "Arithmetic Teacher" program sometimes creates poor multiplication and division problems with the digit 0. Such problems can be avoided by replacing lines 106 and 107 with RCL 05 and by inserting the following steps after line 111:

```
111 LBL "/"
112 X=0?
113 E↑X          }  "new"
114 STO 02
```
